EDUCATION

B.Tech, Artificial Intelligence and Machine Learning 2024 – 2028
St. Joseph's College of Engineering, Chennai CGPA: 8.0/10

TECHNICAL SKILLS

Languages	Python, SQL, C++, C, Java
LLMs & Agentic AI	Multi-Agent Systems, RAG, LangGraph, LangChain, MCP
LLM Engineering	Prompt, Context & Harness Engineering, Guardrails, LLM & Agent Security
AI/ML	PyTorch, TensorFlow, Scikit-learn, Transformers, NLP, OpenCV, CNNs
Backend/Databases	FastAPI, Flask, REST APIs, Pydantic, PostgreSQL, MySQL, Redis, Qdrant, pgvector
Cloud/DevOps	Google Cloud, AWS, Azure, Docker, Git, GitHub
Core CS	DSA, OOP, DBMS, OS, Computer Networks

EXPERIENCE

AI Intern Feb 2026 – Apr 2026
Infosys Springboard

- Turned spoken audio into text transcripts and short summaries by building **TranscribeFlow**, a Flask app using Whisper speech-to-text and T5-small summarization, with MySQL storage, file upload, and in-browser recording.
- Exposed transcription and summarization as REST APIs with downloadable outputs and modular processing stages.

Machine Learning Intern Jun 2025
Elewayte (Wipro DICE ID)

- Built and evaluated predictive models across the ML workflow: preprocessing, feature preparation, training, and evaluation.

PROJECTS

Student Readiness Intelligence Platform Live Demo
AI & Agent Lead, team of 5 — Ongoing · LangGraph, Multi-Agent, RAG, MCP, FastAPI, PostgreSQL

- Architected a stateful LangGraph agent (**6** nodes, conditional routing, PostgreSQL checkpointing) that turns verified scores across a **12**-parameter framework into personalized **30/60/90-day** plans, for a college platform handling **10,000+** users.
- Built a multi-agent pipeline where a Roadmap Architect drafts the plan, a tool-calling Resource Curator enriches it, and a Critic agent self-reviews effort, specificity, and gap coverage, then triggers one refinement round.
- Engineered prompts that sandbox untrusted student input behind injection checks, and enforced structured JSON output through Pydantic schemas with a grounding check that every milestone a task cites is a real ranked gap.
- Eliminated hallucinated links by stripping LLM-written URLs and sourcing resources only from **5** search tools built as MCP servers (YouTube, GitHub, DuckDuckGo, arXiv, Semantic Scholar), ranked by embedding similarity.
- Kept generation fast and available with per-role LLM fallback chains (self-hosted **Qwen**, **Claude**, **Gemini**, **Groq**), in-process MCP calls (under **100** ms vs. about **2** s over stdio), **6**-hour search caching, and a **300** s planning time budget.
- Shipped the agent as a FastAPI service in Docker behind the AI gateway, covered by **164** hermetic tests (no network, no API keys).

Memora – Multi-Tenant RAG Chatbot GitHub
Python, FastAPI, PostgreSQL, Qdrant, Redis, Docker

- Delivered grounded, cited answers over each user's own documents by building a RAG backend on FastAPI, PostgreSQL, and Qdrant, with BGE embeddings (**768**-dim) and a Groq-hosted LLM.
- Avoided ungrounded answers by refusing without an LLM call when nothing relevant is retrieved, and by deduplicating and compressing context to a **6000**-character budget.
- Isolated every tenant's data with `user_id`-filtered Qdrant search and an **11**-pattern prompt-injection guard, deployed as a **5**-service Docker Compose stack with Prometheus metrics.

ArtDetector GitHub
FastAPI, React, PyTorch, EfficientNet-B0

- Reached **90.6%** validation accuracy on detecting AI-generated artwork by training a PyTorch EfficientNet-B0 classifier.
- Served image and video analysis with authentication and prediction history through a FastAPI backend and React frontend.

ACHIEVEMENTS & CERTIFICATIONS

- **Leadership:** Google Student Ambassador (**2026**).
- **Achievements: 1st Place**, Innovation Smart Hackathon; GSSoC **2026**; Open Source Connect India **2026**.
- **Certifications:** AWS Certified AI Practitioner (**2026**); Oracle Cloud Infrastructure **2025** AI Foundation Associate.
- **Competitive Programming: 700+** LeetCode problems; AtCoder **900+**; Codeforces **1200+**.
